"Lighting is our passion and has been at the heart of our family business for 6 decades.
Our product is proudly 'Made In Britain' as TYSON manufactures at our HQ in Lancashire, creating handmade light fixtures using traditional techniques, passed down through generations.

I have curated a team of likeminded professionals to share and build our dream with. We are lighting designers, product designers and manufacturing engineers with grit, determination and with skill at our craft to rival the worlds renowned lighting producers.

...We are TYSON."

ANDREW GIBSON
CEO, TYSON

WHO IS TYSON?

In 1961 Harold Tyson & Co Ltd was established to sell lighting to local businesses. Today as we approach our 60th birthday we directly supply 1300 projects per year, working with designers, architects, specifiers and end clients in number of industry sectors. Its important to us and a source of pride that we are still family owned, now by the 3rd generation of TYSON offspring.

We are a multi discipline family company. For six decades we have been working tirelessly with our customers to deliver lighting to projects worldwide and now with a curated collection of furniture brands we complete our portfolio to offer a package whatever the project.

TYSON supply all types of lighting + furniture for commercial + residential projects.

We offer the following services.

Lighting design.

- Initial concept designs
- Lighting layout
- Lux calculations
- Circuit layout
- Dimming controls
- Product specification + luminaire schedule
- Commissioning + site visits

Bespoke Lighting.

- Product design
- In-house manufacturing
- Onsite co-ordination for installation

Branded supply.

Supply of over 250 brands offering:

- Lighting
- Furniture
- Accessories

Exclusive UK distribution.

UK agents + distributors for lighting brands:

- B.Lux
- Buzzi & Buzzi
- Molto Luce
- Loum
- And Light
- Rotaliana
- Pott

LIGHTING DESIGN

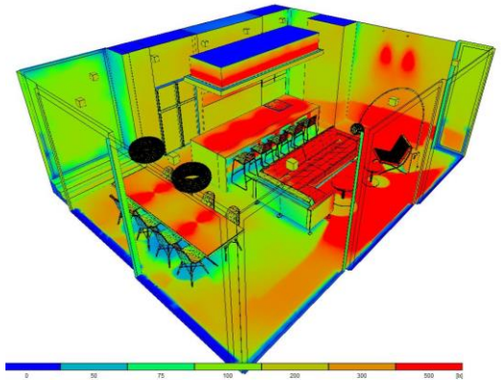
TYSON offers a fee based lighting design scope of services, based on your needs and requirements.

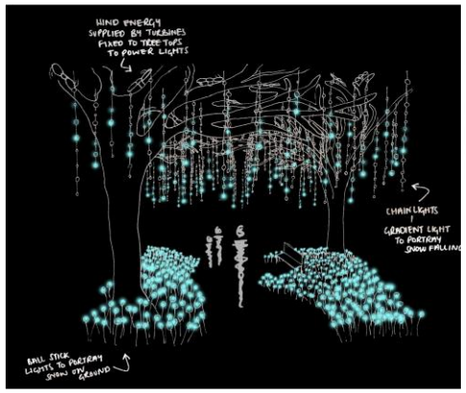
In order to establish and agree a fee for our lighting design a ‘Scope of Works’ document is provided, the Scope of Works is divided into five RIBA Stages depending on the required involvement from us, a tailored package is agreed with the client. We work to CIBSE industry standards.

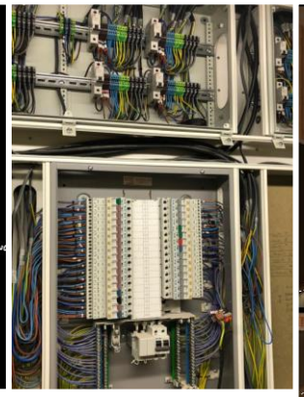
The purpose of the scope of works is to establish the parameters of the tailored lighting design service we will be providing to you and ultimately, guide our fee proposal.

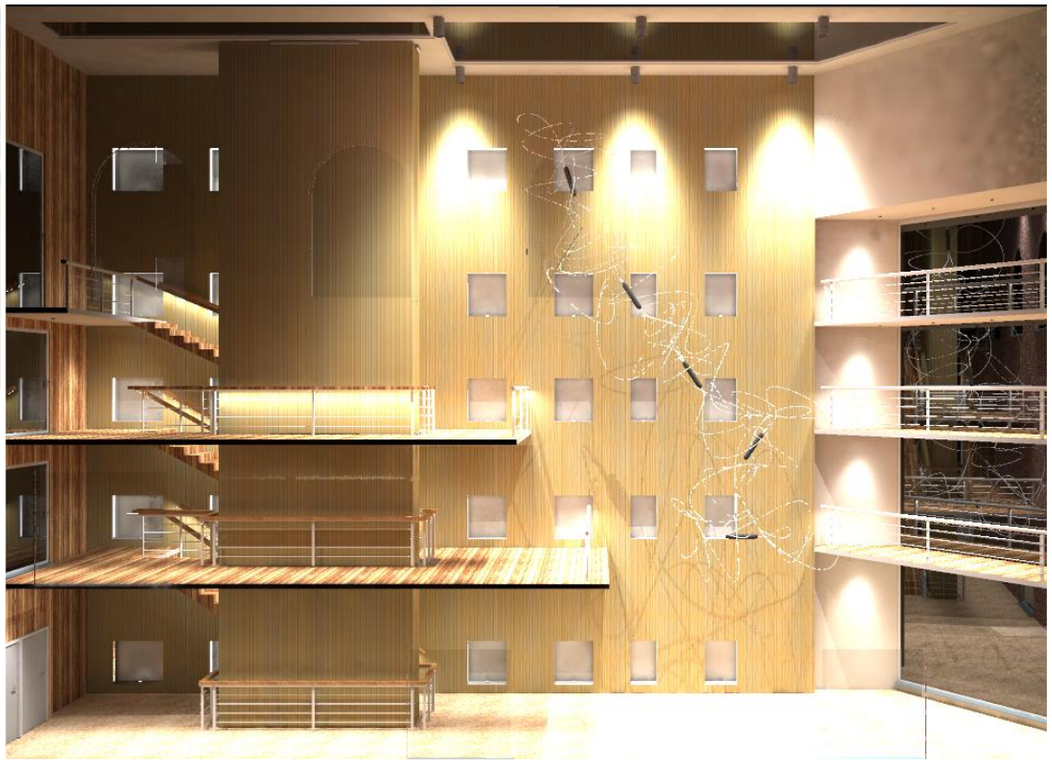
Our package includes:

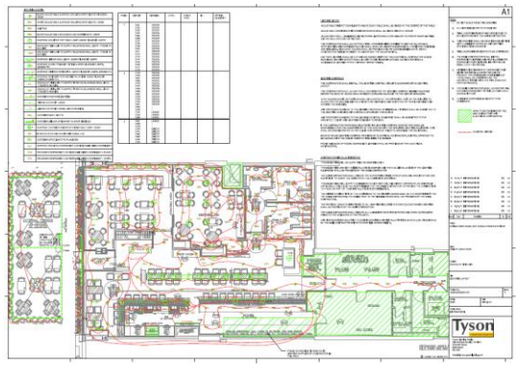
- Initial concept designs,
- Lighting layout development + drawings,
- Specification + luminaire schedule,
- Lighting calculations,
- Commissioning + site visits.







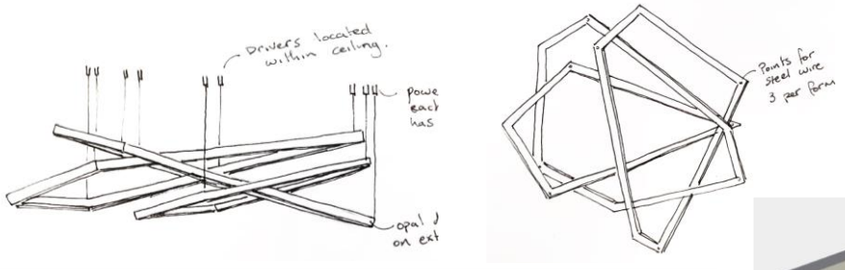


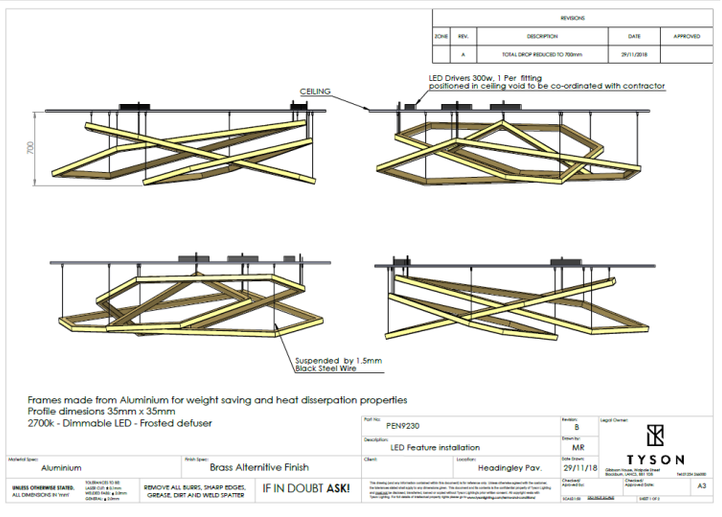


PRODUCT DESIGN

Tell us your ideas, show us your sketches and inspirations and our experienced team of product designers will work alongside you to transform your concept from paper to product. Using the latest SOLIDWORKS professional software we will break down the components required and virtually build your vision allowing you to see its inherent workings and ensuring viability of design. As part of the process we will supply sample swatches of materials and finishes to ensure the exact finish you require is achieved.

From there, detailed product design drawings will be passed to our manufacturing team who will then fabricate at the highest standard, using traditional and modern methods to create your bespoke light fitting.





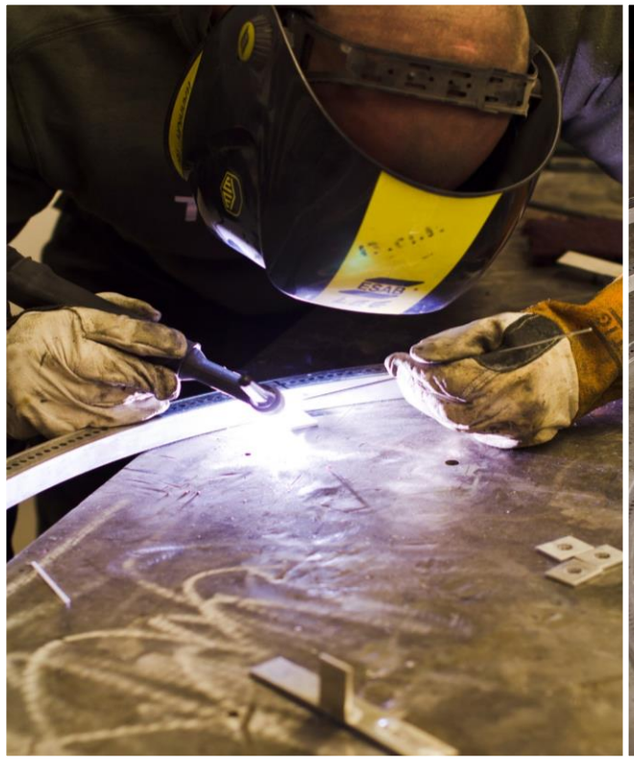
MANUFACTURING

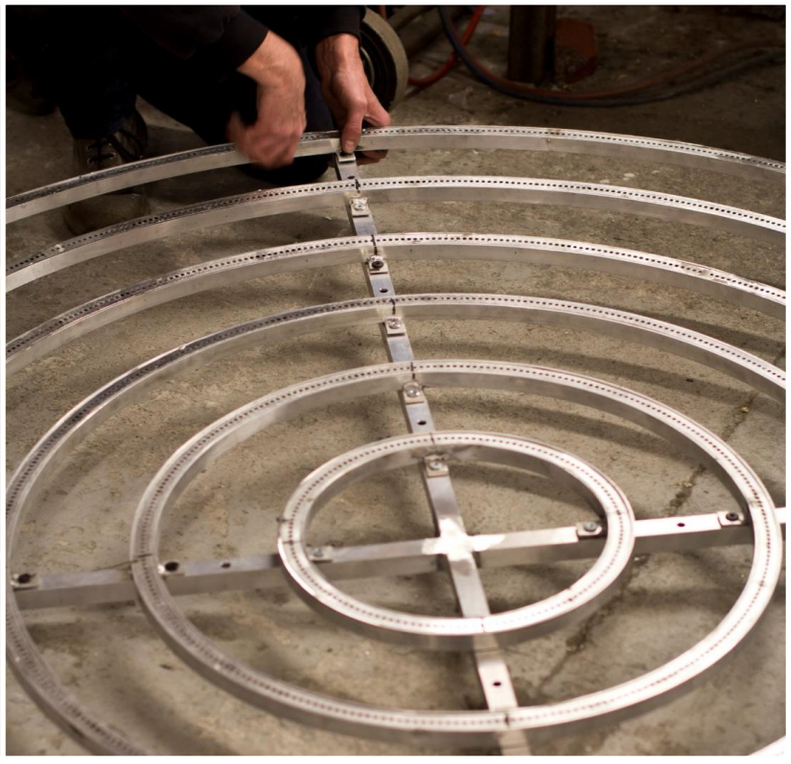
Step into TYSON HQ in Lancashire and you will see, hear and smell the efforts of great British manufacturing. We produce custom light fittings supplying projects globally across all project disciplines. With a strong team of makers and technicians armed with highly specialised machinery and years of know-how, TYSON can build a light fitting to any specification.

TYSON's specialism lies in metal work. Our machining capabilities include processes such as metal turning, cuts, ring-rolling and drilling. We have a team of skilled craftsmen who can offer services such as tig and mig welding, silver soldering and metal bending.

All our work is carried out in accordance with BS EN 60598.

Our products are tested using high voltage equipment with the facility for laboratory type testing when needed. We test all components for continuity including light sources, drivers and control gear to ensure compatibility with the required dimming protocol.





UK DISTRIBUTORS

TYSON also offer exclusive UK distribution of leading lighting brands to retailers, contract dealers and directly to projects.

Our portfolio of Brands come from Austria, Canada, Italy and Spain, offering decorative and architectural lighting ranges to with a difference.

Our exclusive brands include...

AND Light
B.Lux
Buzzi & Buzzi
Molto Luce
Loum
Rotaliana
Pott

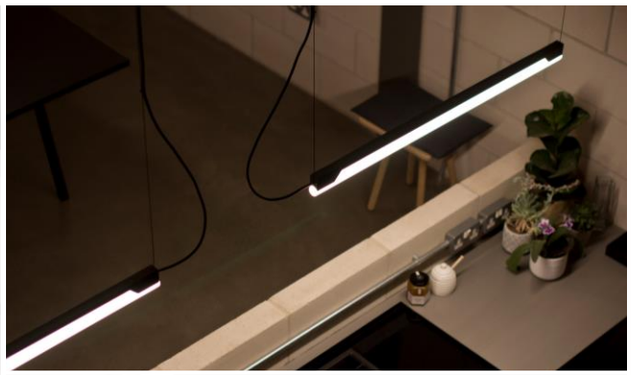
TYSON .Studio launched its founding collection, ‘STRIP’; a collaboration with D__E__D; on Channel 4’s Grand Designs TV programme which was first aired on the 17th October 2018.

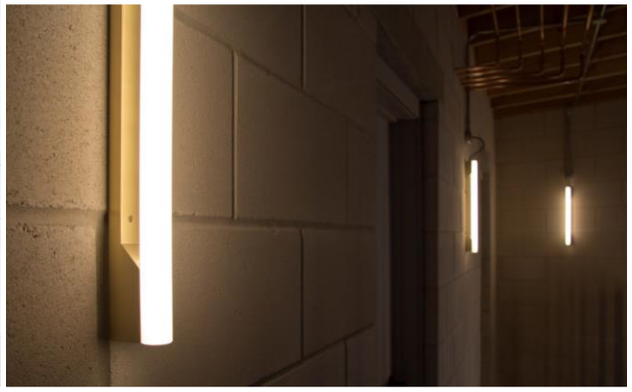
Taking inspiration from the idea of a basic, paired down florescent tube lamp holder, the design is a modern graphical representation of a traditional strip light using the latest LED technology and a refined aesthetic.

Hand made in Britain by TYSON using techniques passed down through generations of dedicated engineers.

Our hands on approach ensures each fitting is manufactured and assembled to the highest standards, using the best quality materials and components.

By taking control we ensure every product that leaves our premises meets our own exacting standards.





TYSON PROJECTS

The following pages contain examples of the varied project work carried out by TYSON. They have been broken down into the below categories:

Residential
Bar
Restaurant
Hotel
Commercial + Office

Through the relationships built up over nearly 60 years in business, with suppliers, interior designers, architects and electrical contractors we have been privileged to add our expertise to some beautiful projects.
